The United States Army's DV 12, Army Riding Regulation 12, is the official document that governs all aspects of mounted warfare for the U.S. Army. This regulation provides detailed instructions on the care and handling of horses, the techniques of riding, and the tactics of mounted combat. Mounted warfare has been a part of the U.S. Army since its inception. The first mounted units were established in the early 1800s, and they played a key role in the War of 1812. During the Civil War, both the Union and Confederate armies used mounted cavalry to great effect. In the 20th century, mounted cavalry units continued to serve in both World War I and World War II.

After World War II, the U.S. Army began to transition to a more mechanized force. However, mounted cavalry units continued to be used in a variety of roles, including reconnaissance, security, and combat support. In the 21st century, mounted cavalry units have been deployed in Afghanistan, Iraq, and other combat zones.
