Movement determines how far a unit can move in a turn, Strength determines how much damage a unit's attacks do, Toughness determines how well a unit can withstand damage, Attacks determines how many attacks a unit can make, Wounds determines how much damage a unit can take before it is destroyed, and Leadership determines how well a unit can resist morale checks.

In addition to their stats, units also have a variety of special rules that can affect their performance in battle. These rules can include things like bonuses to combat, immunity to certain types of damage, or the ability to fly.

One of the most important aspects of Warhammer Fantasy Battle is army selection. There are a wide variety of armies to choose from, each with its own unique strengths and weaknesses. When choosing an army, it is important to consider your playstyle and what kind of army you want to play.

It is important to consider your army's overall strategy and what role each unit will play in battle.

Once you have your army selected, you will need to develop a battle strategy. There are a variety of different strategies that you can use, depending on your army's strengths and weaknesses. Some common strategies include:

- **Rush:** This strategy involves sending your entire army forward and attacking your opponent as quickly as possible. This can be a very

effective strategy if your army is faster and more powerful than your opponent's army.

- **Turtle:** This strategy involves staying back and defending your position. This can be a good strategy if your army is weaker than your opponent's army, or if you are trying to protect a key objective.
- **Flank:** This strategy involves attacking your opponent from the side or rear. This can be a very effective strategy if your army is faster and more agile than your opponent's army.
- **Ambush:** This strategy involves hiding your army and attacking your opponent when they least expect it. This can be a very effective strategy if your army is smaller and weaker than your opponent's army.

The best battle strategy for you will depend on your army's strengths and weaknesses, as well as the terrain and objectives of the game. It is important to be flexible and adaptable, and to be willing to change your strategy as needed.
